

## Storm Surge and Your Waterfront Property

*We need your help on our beaches this winter!!*

Attend a free training to help Snohomish County and USGS collect data along the Port Susan waterfront to see how storm surge is affecting the shoreline.

**When:** Oct. 21 from 4-6 p.m. RAIN OR SHINE

**Where:** Kayak Point Regional Park

15610 Marine Drive Stanwood, WA 98292

Meet at the large Southern Picnic Shelter by beach

**Join a citizen science monitoring network which will:**

- Monitor how weather events affect the shoreline
- Assist scientists by gathering data to evaluate coastal processes and their impact

**Workshop topics include:**

- How to help scientists monitor our shorelines
- Coastal, beach, and bluff processes and impacts of shoreline armoring
- Proper data collection techniques
- Instruction on how to collect data and use a new tool to easily upload and share the data right from your phone!

**Use MyCoast:**

MyCoast is a website and phone app which lets you upload photographs and characterize environmental conditions associated with storm events. Download the app on your phone—search for MyCoast (blue urchin) and register before the workshop [mycoast.org](http://mycoast.org).

**RSVP by phone at: 425-388-6414**
